

Dear Khun Suthida,

This is Im, Joon Ho, engineering manager of SKEC.

SKEC is Main Contractor for PTTGC's Polyols Project and project is located in Map Ta Phut.

Now, we are at commissioning phase, and looking for process engineers and mechanical supervisor who can support commissioning activities.

The simple job description that we expect from your engineers/supervisors are ;

Please see below, and please let us know you have available manpower for this support.

1. Process Engineers (Or Skilled Operator) – **2 Persons**

⇒ Board Operation of Batch Process

⇒ Coordinate with SKEC engineers and field operators for operation activities

2. Mechanical Supervisor – **1 Person**

⇒ Maintenance of Equipment in trouble

⇒ Coordinate with 3rd party company (We have subcontractor for maintenance work)

Important Notes;

- 1) This is batch process, so engineers/operators/supervisor experienced in batch operation is strongly preferred.
- 2) Duration for expected service is until end-Oct ~ mid-Nov (Start is ASAP)
- 3) There is a chance for shift operation. Our commissioning teams are working in shift group.
- 4) In our project, there are several engineers working in Owner side, dispatched from PTTME.
(If needed, please let me know then I will give contact point so you can easily get the information of our project)

You can see the details about our project in below link.
