

Name : Pramote Panyato

Contact : pramote.p.1990@gmail.com / 084-1515707

Date of birth : 23 Jul 1990

Work experience : May 2013 – Present [7 Years]

Education :

-Master degree : Electrical Engineer [Mahanakorn University of Technology]

Thesis : A YOLO-Based Hand Tools Recognition for 5s Audit in Manufacturing Industry.

: Implementation of a Low-Cost Real-Time People Counting System on Raspberry Pi Based on Applied Tiny YOLO V3.

-Bachelor degree : Computer Science [Lampang Rajabhat University]

Overview Skills :

**C#.Net, VB.Net, C, Python, VBA, Delphi, ASP.Net
Web Service, XML, IoT, Arduino, Raspberry Pi**

**Image processing, Object recognition,
Deep learning, Machine learning**

+ Others

**Project management, Kepware OPC, Cognex
SCADA : WinCC, Genesis, Citect, Omron, Wonderware**

Oracle, MS SQL, MySQL

**Siemens, Omron,
Mitsubishi, Allen Bradley**

Overall Work Experience [May 2013 - Present]

System Analyst

Electronic Manufacturing
[Oct 2019 - Present]

Software Development Engineer

Home Appliance Manufacturing
[May 2018 – Oct 2019]

Control System Engineer

Home Appliance Manufacturing
[May 2017 – May 2018]

Automation Engineer

Oil & Gas
[Apr 2015 – May 2017]

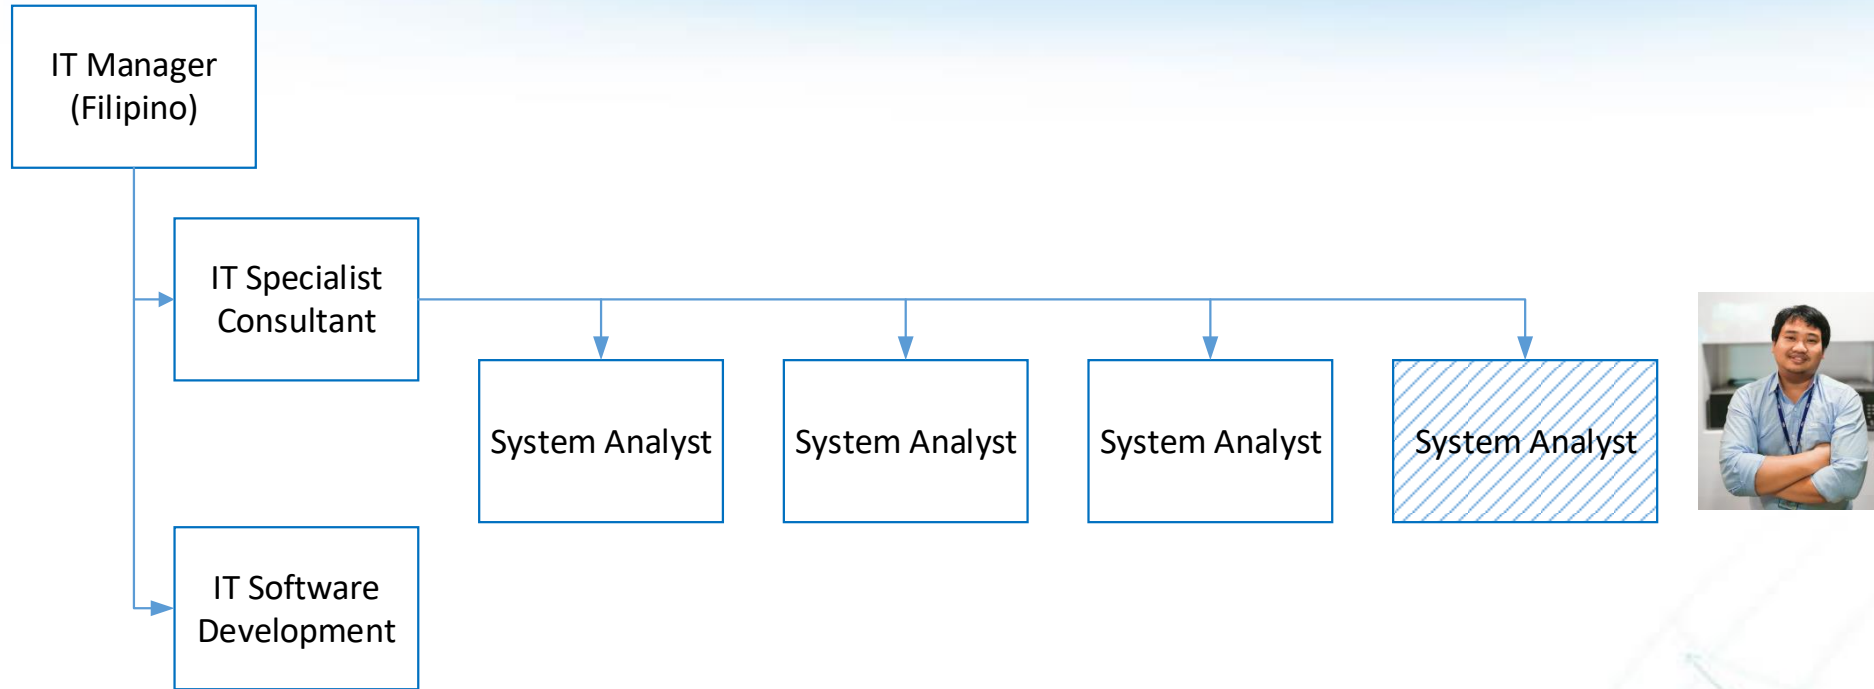

Programmer

Real Estate Developer
[May 2013 – Apr 2015]

Software Development Engineer [Oct 2019 - Present]

Job Organization

Skills and Responsibility Area

VBA, VB.Net,
C#.Net, ASP.Net,
Web Service, XML

Oracle, MS SQL

Application

Transport

Network

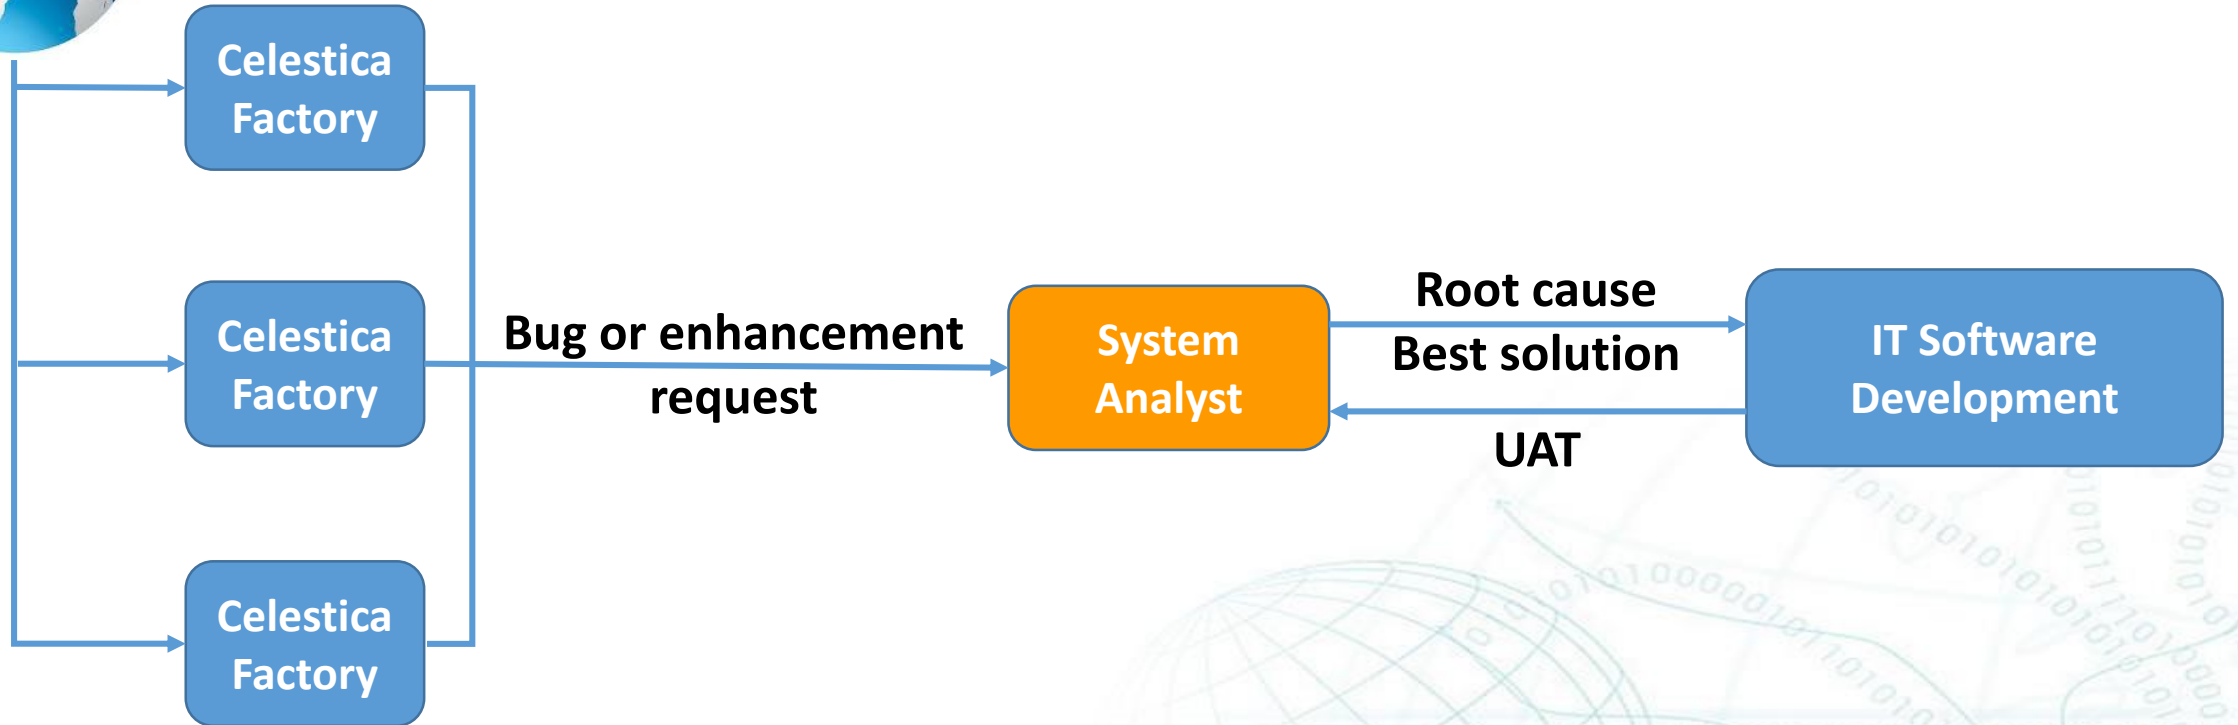

Network
Interface

Responsibility
Area

Production system analyst
(Production, Material Control, Interface)

Job Overview

 **My Responsibility**

Achievement

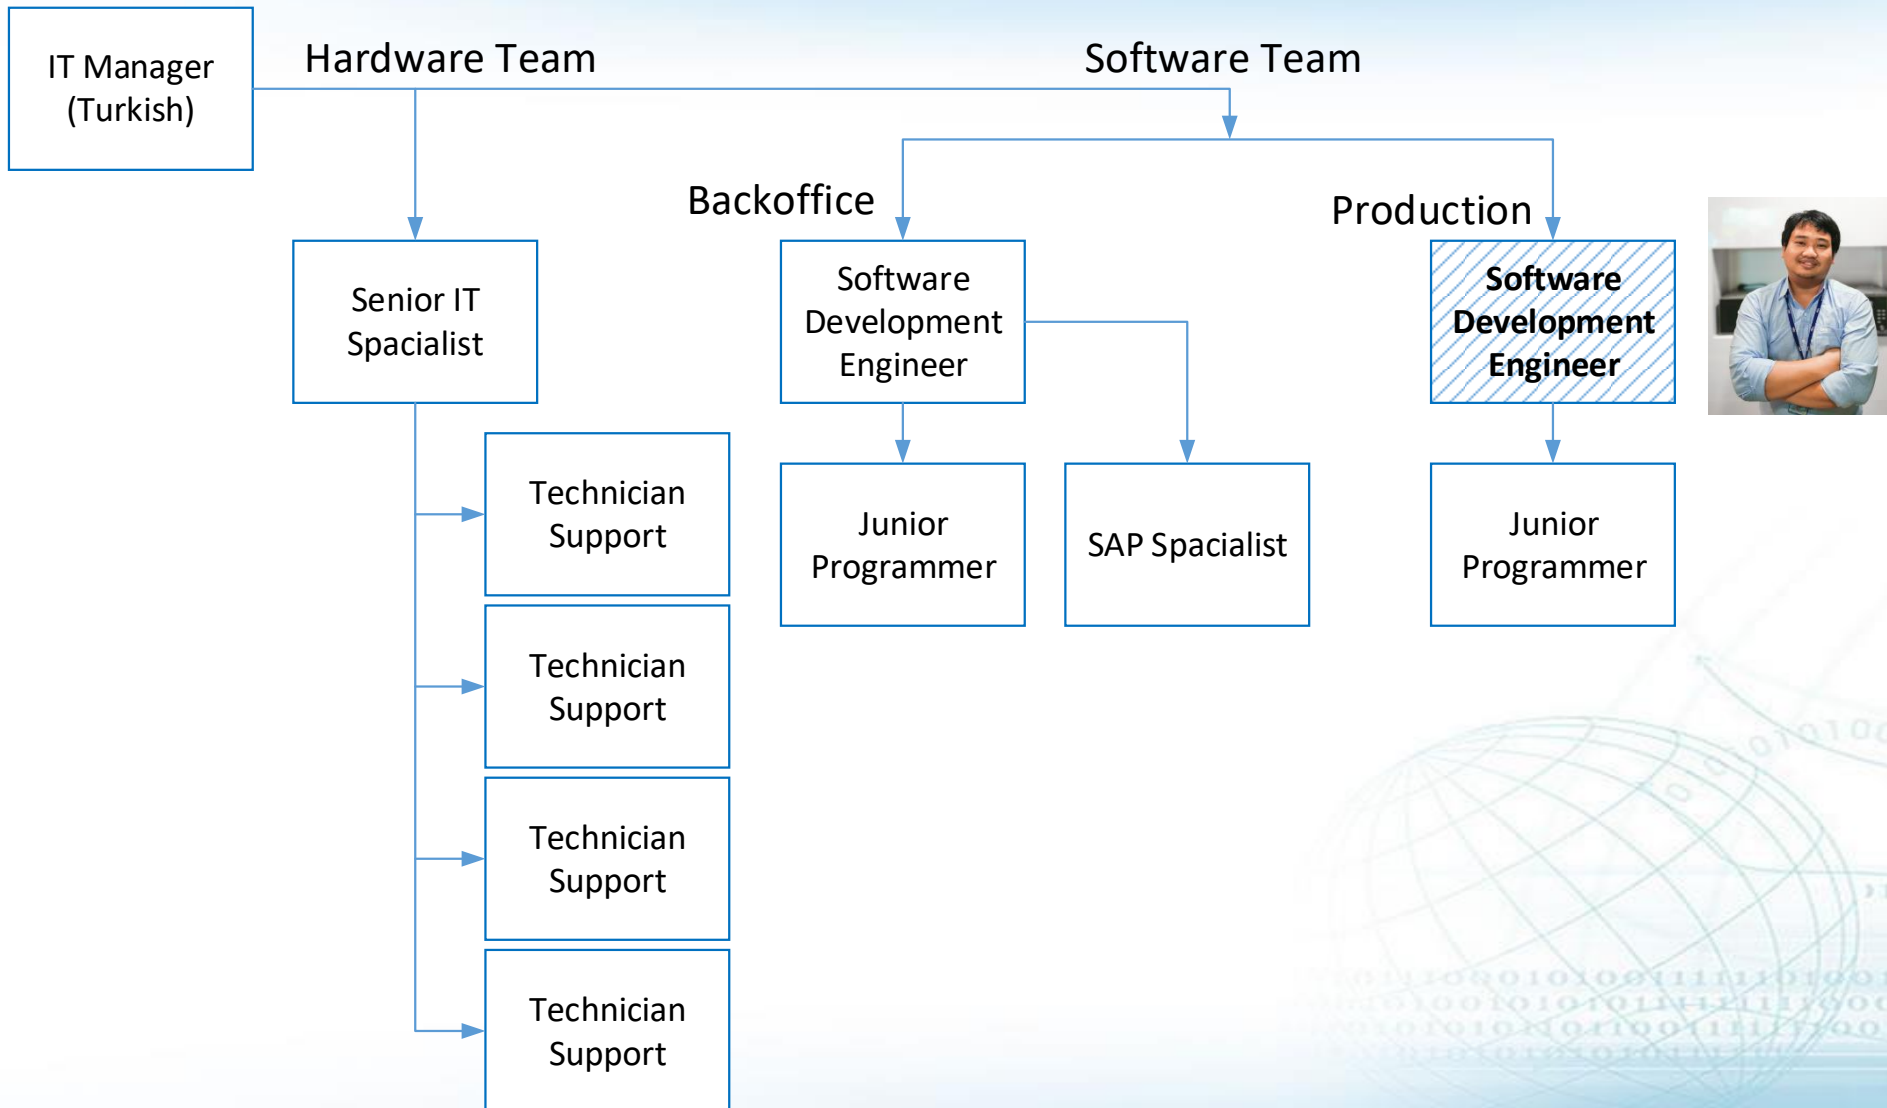

System Analysis

- Solution analysis for bug or enhancement for systems (Production system, Component Tracking System [CTN], Moisture Sensitive Devices [MSD], Report from all Celestica factory.
- Agile and scrum.
- Technical document (Diagram, Flowchart, Data dictionary).
- Coordinate between user and developer to analyst the raw requirement from user and transform to technical design and document to programmer.
- UAT.

Software Development Engineer [May 2018 – Oct 2019]

Job Organization

Skills and Responsibility Area

C#.Net, VB.Net, C, IoT, Arduino, Raspberry Pi, Web Service, XML

Image processing, Object recognition, Deep learning, Machine learning

MS SQL

Siemens, Omron, Mitsubishi

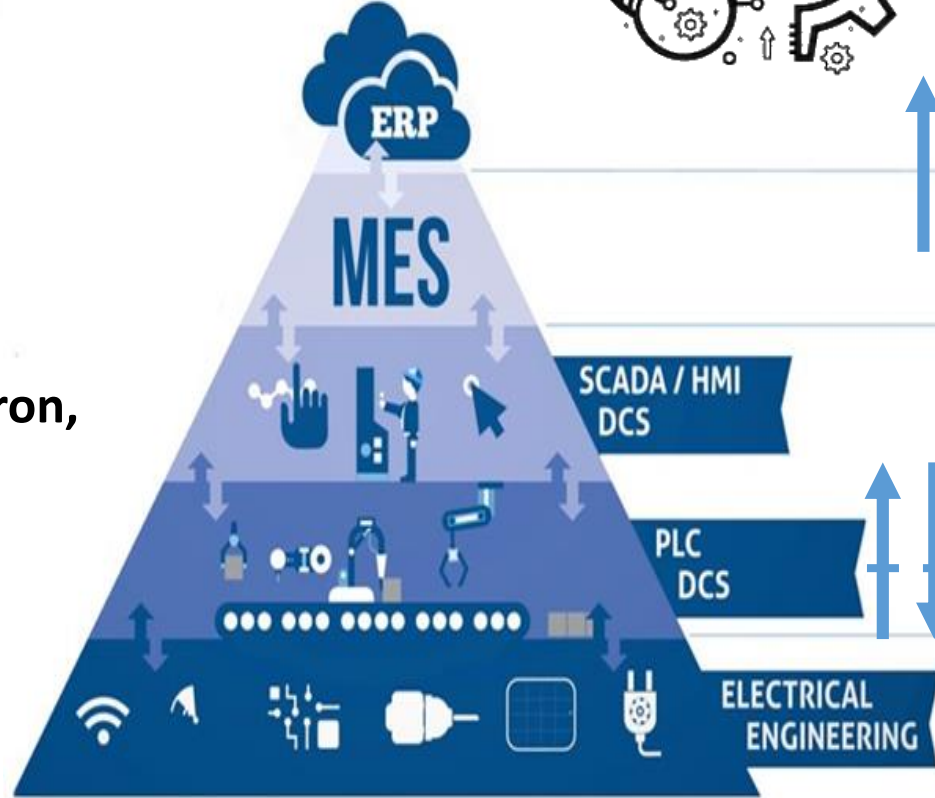

Omron, WinCC

+ Others

Project management, Kepware OPC, Cognex, Micro Controller

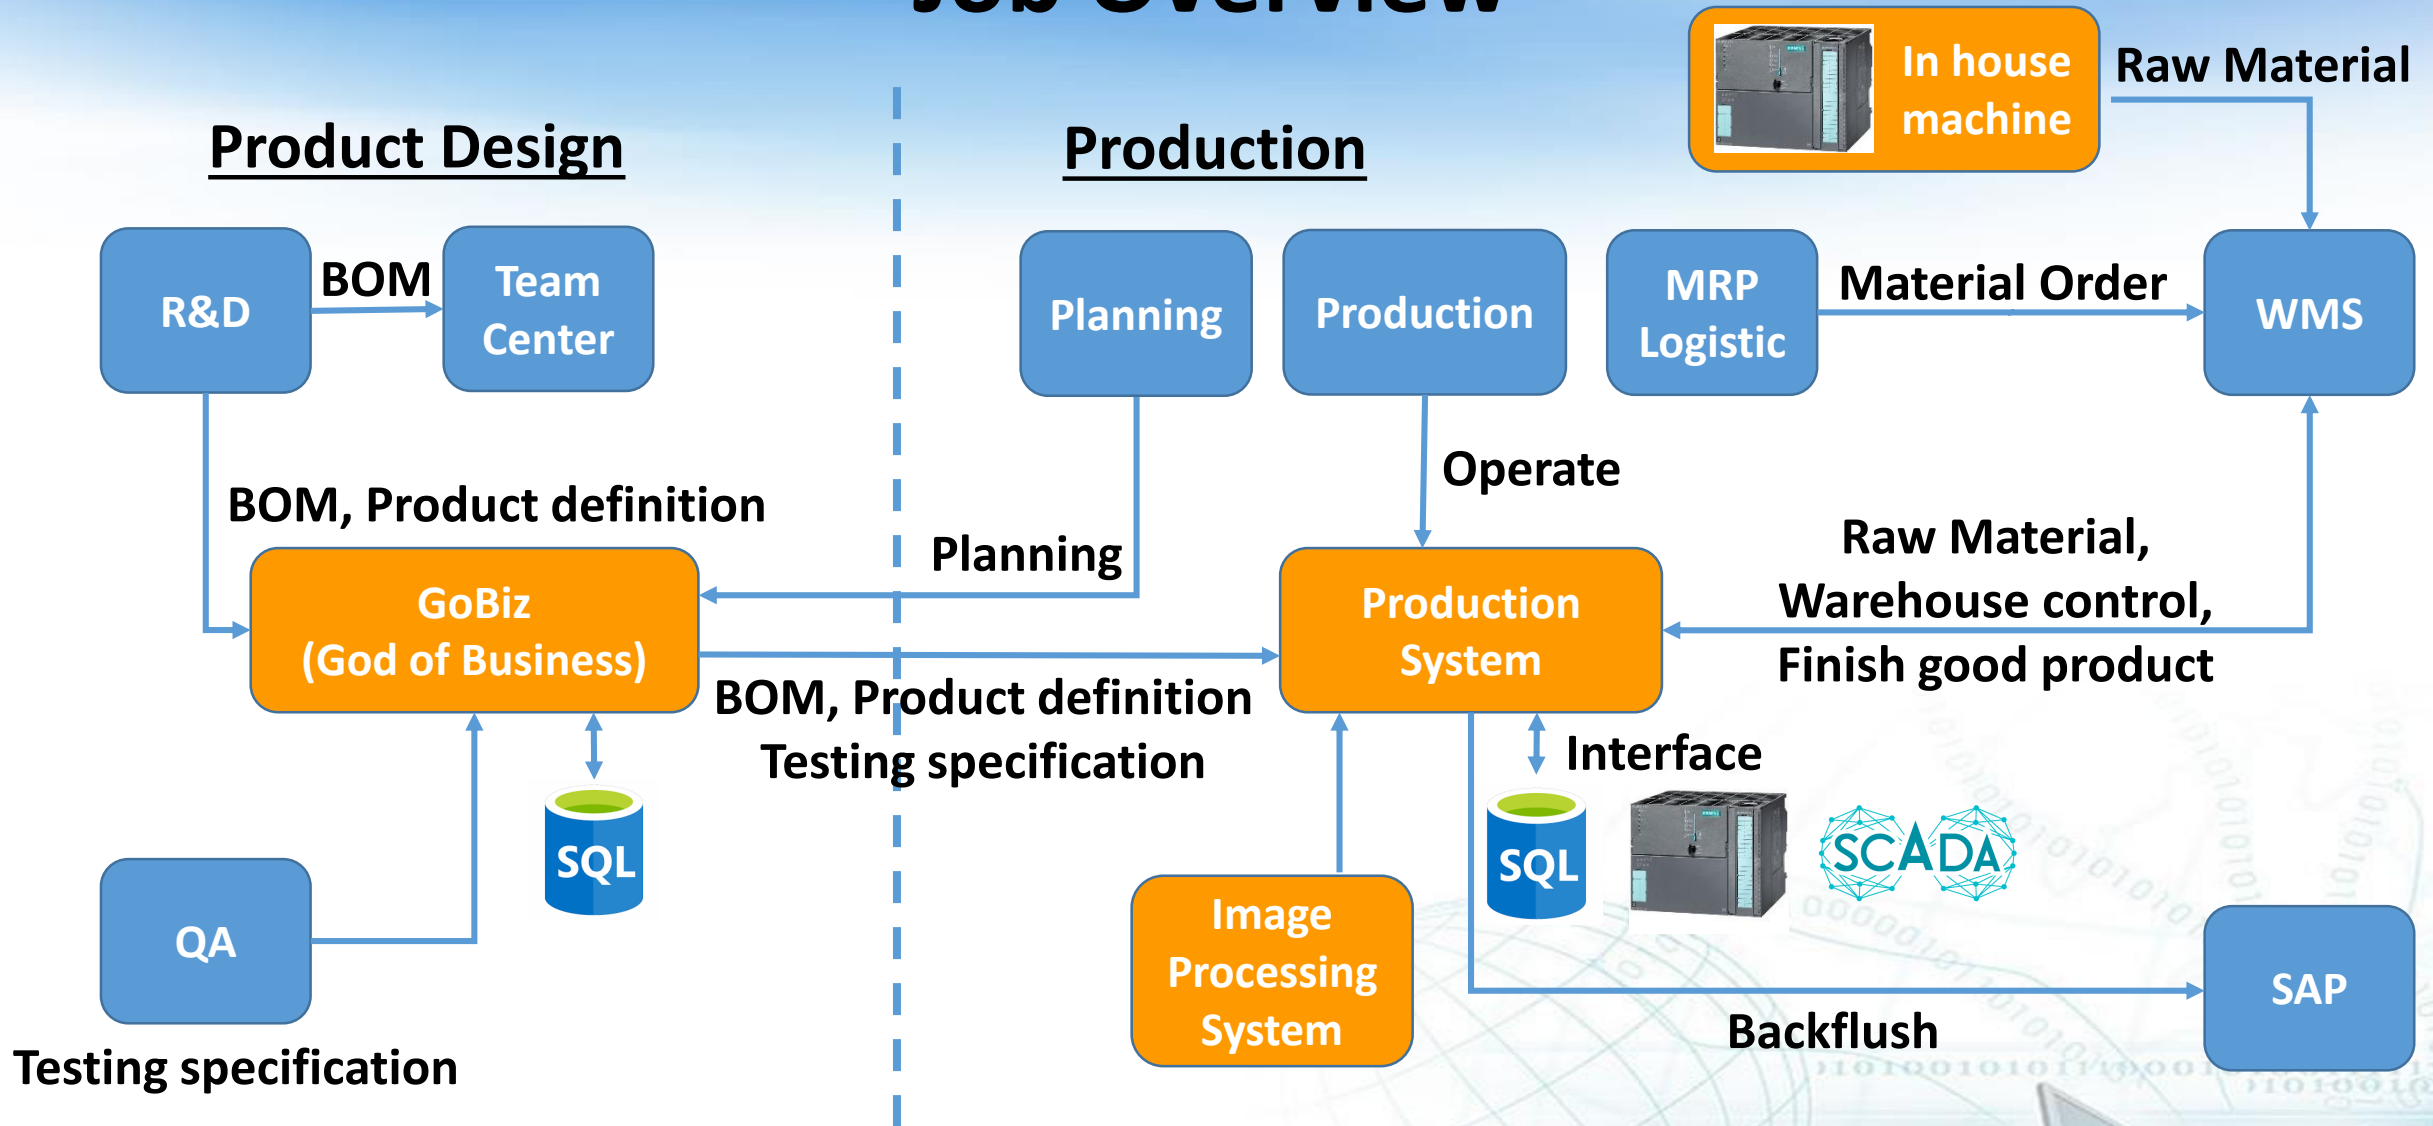

Data feed from production line to ERP

Responsibility Area

Integration and migration system to communicate between machine and system

Automation

Job Overview

Achievement

Refrigerator and Washing machine production system .

(Machine interface, Assembly station, Testing, In house machines and data feed to ERP)

- Project management, Solution analysis, design, development and UAT.
- Implementation, training and support.

GoBiz system (God of Business)

- GoBiz is part of PLM to collect BOM of products that developed from Beko IT by C#.Net.
- Product definition for production system, testing system and WMS.

Real-time product performance testing information by Arduino. <https://youtu.be/UIQBLlgGiBo>

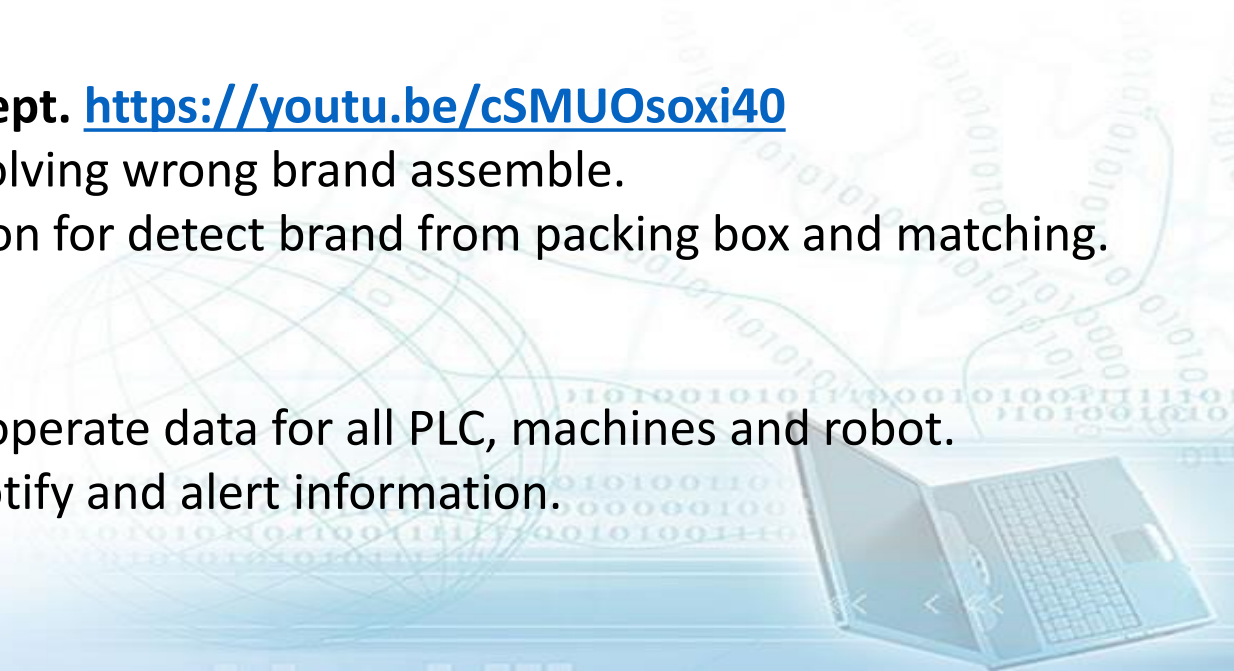

- Arduino programming by C to get refrigerator information.
- Real-time data feed to server by Socket C#.Net.

Packing box brand recognition base on deep learning concept. <https://youtu.be/cSMUOsoxi40>

- Matching between product and packing box for solving wrong brand assemble.
- Develop object recognition by AI concept by Python for detect brand from packing box and matching.
- Conveyor integration by matching result.

PLC data center and notification system.

- Data center system by C# and OPC to collect and operate data for all PLC, machines and robot.
- Notification system by Line application, Mail to notify and alert information.

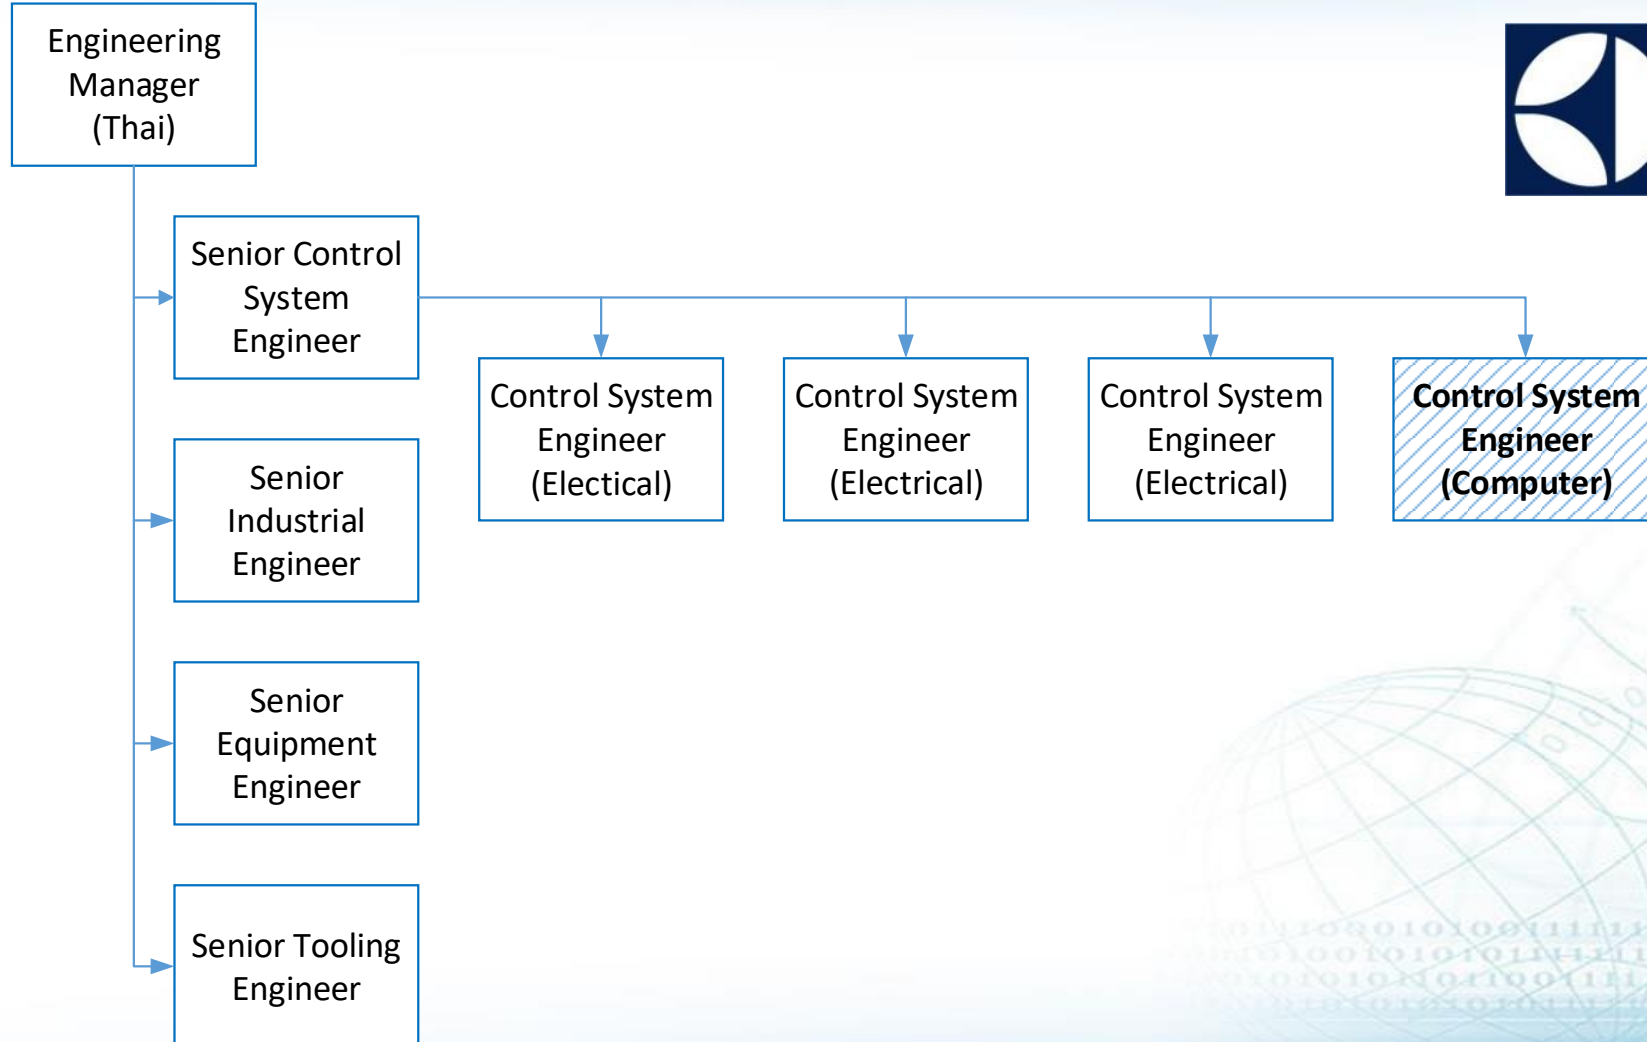

Control System Engineer [May 2017 – May 2018]

Job Organization

Electrolux

Skills and Responsibility Area

VB.Net, C#.Net

MySQL

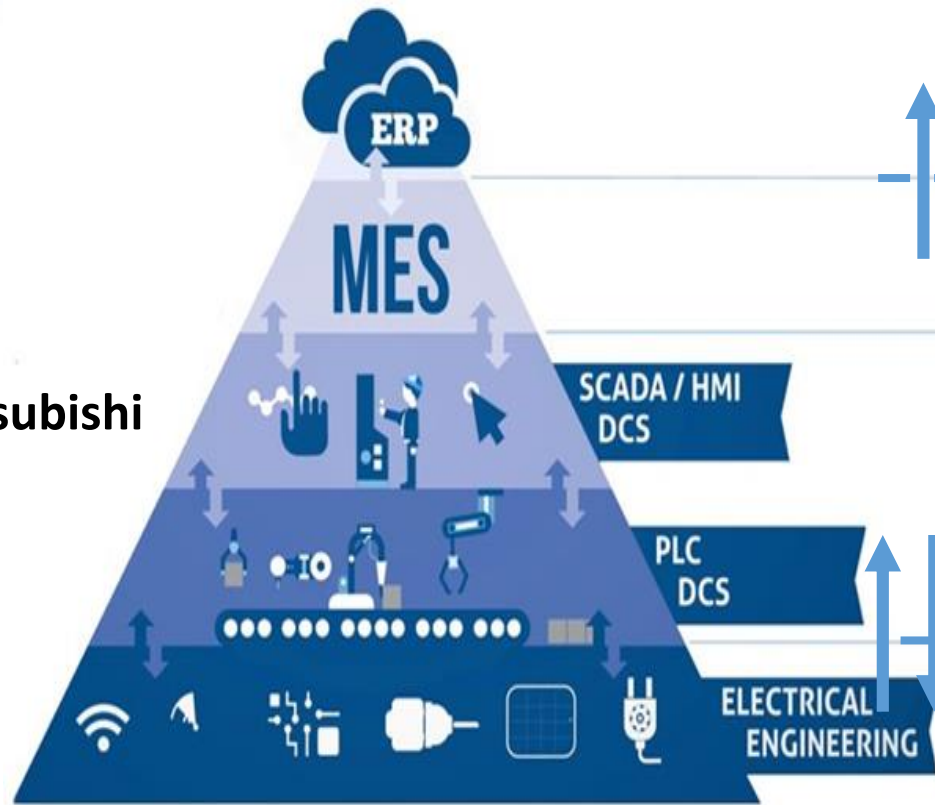

Siemens, Mitsubishi

Genesis,
WinCC

Project management,
Kepware OPC

Data feed from production line to ERP

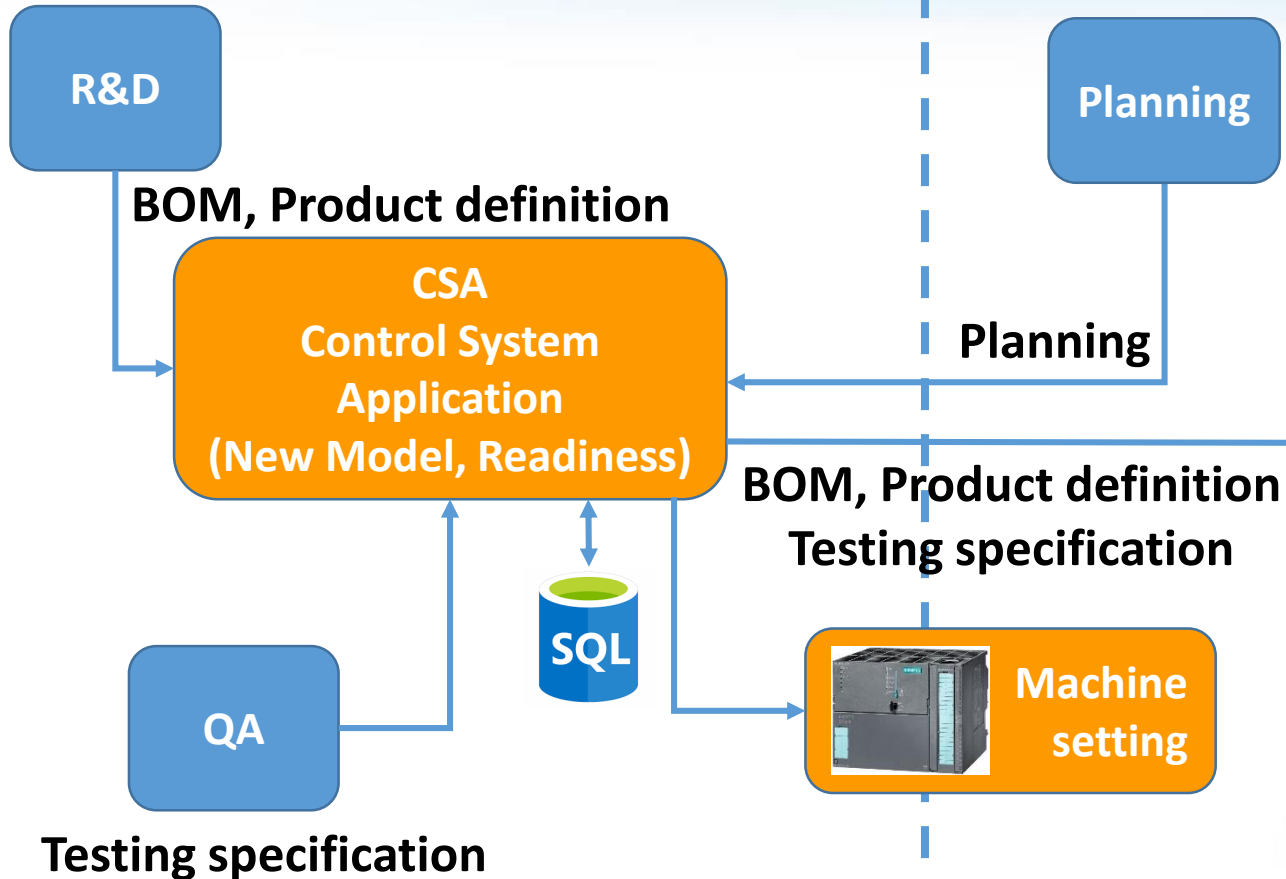

Integration and migration system
to communicate between machine and system

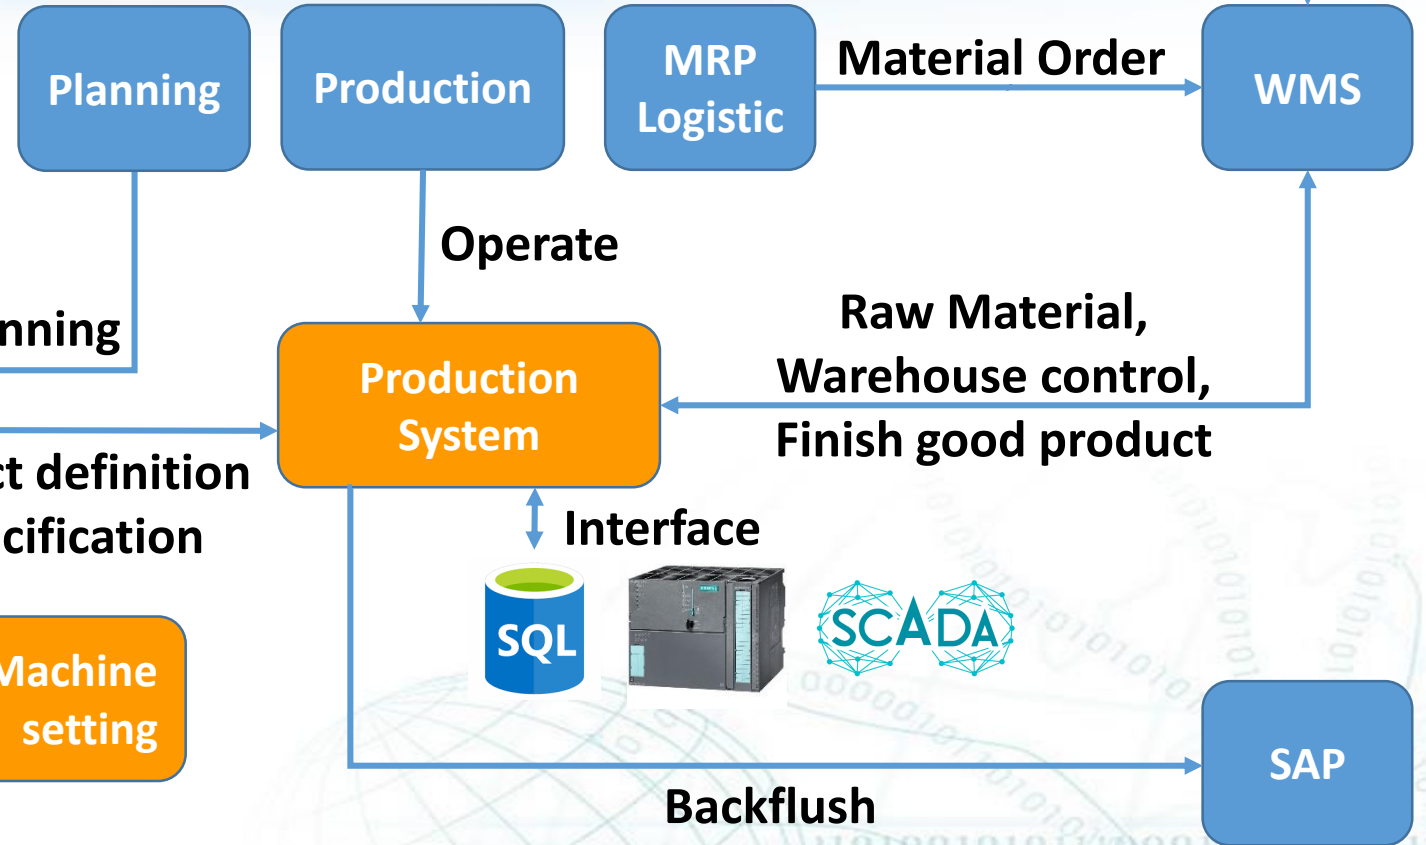

Job Overview

Product Design

Production

 **My Responsibility**

Achievement

Refrigerator production system .

(Machine interface, Assembly station, Testing, In house machines and Data feed to ERP)

- Project and outsourcing management.
- Project analysis, design, development and UAT.
- Implementation, training and support.

Line application notification system.

- Notification system by Line application to notify and alert any information.

CSA (Control System Application).

- CSA is my application for increase performance for new model, readiness tracking by VB.Net.
- Product definition data center.
- PLC and machine monitoring system.

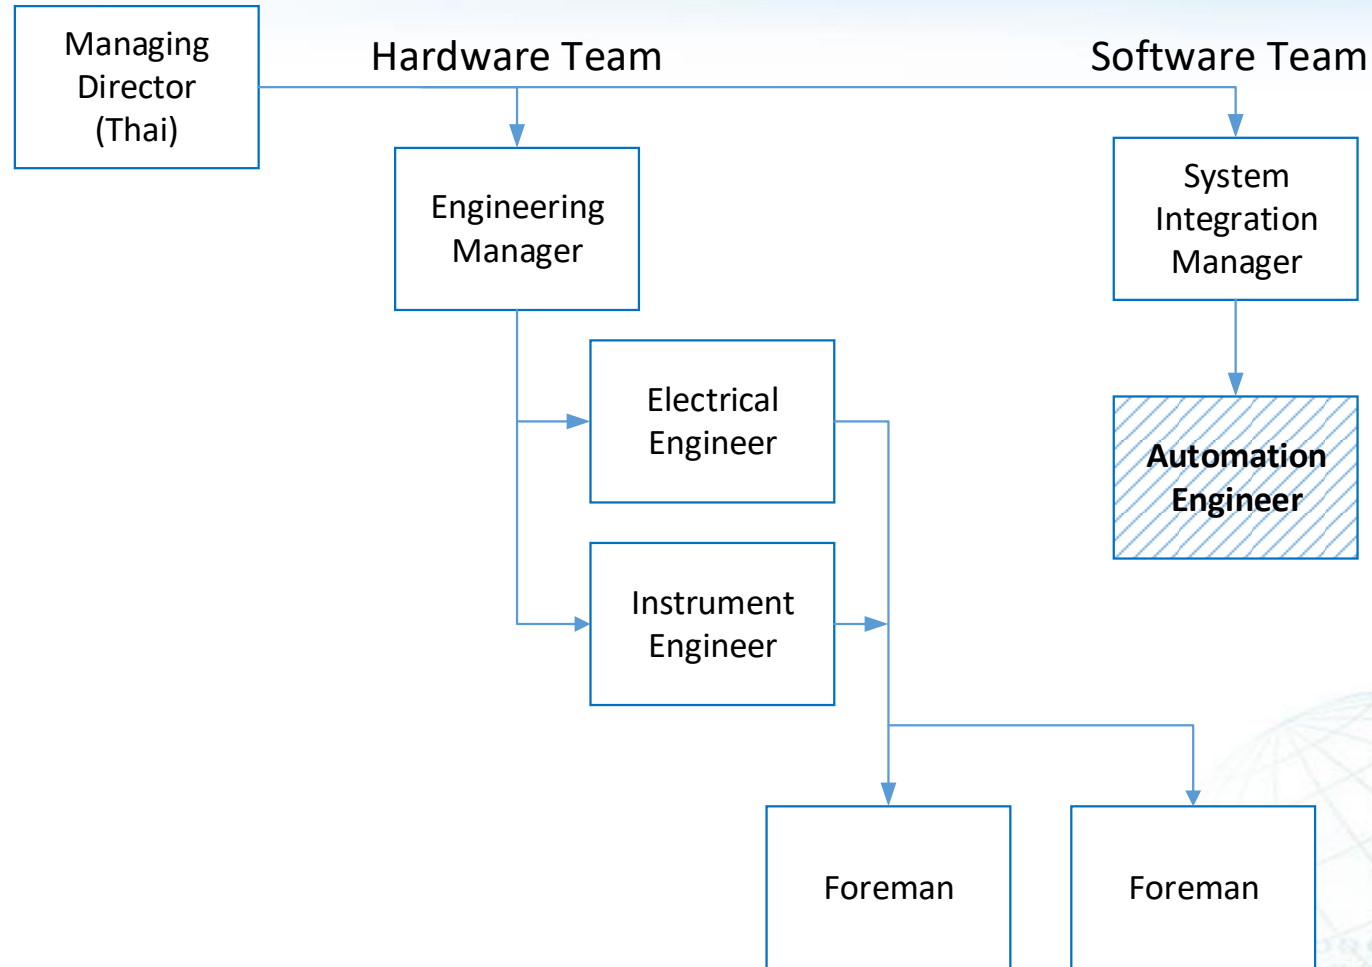

In house machines material warehouse.

- Plastic silo.
- Metal sheet tracking.

Automation Engineer [Apr 2015 – May 2017]

Job Organization

Skills and Responsibility Area

Delphi, VBA

Oracle

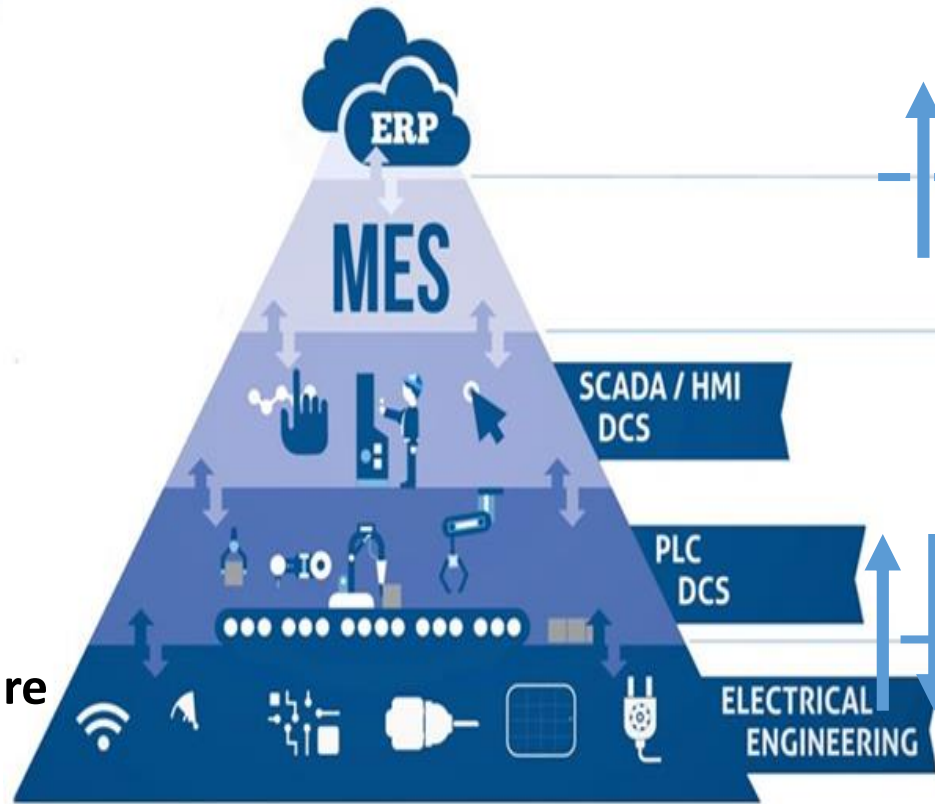

Allen Bradley,
Siemens

Citect,
Wonderware

Keeware OPC

InBound / OutBound PTT ERP

Responsibility
Area

Integration and migration system
to communicate between machine and system

Hardware Team

Job Overview

PTT
ERP

Tank farm
interface system

Control room
SCADA

Pump

Valve

Weight control

Weighbridge

My Responsibility

Fuel
receiving / supply

PTT Sea berth
Operating system

TAS
Terminal
Automation System

Fuel supply

The Revenue Department of Lao People's Democratic Republic

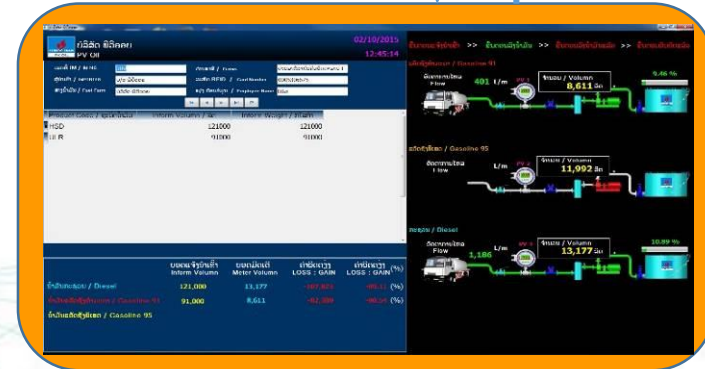

Fuel import

Shipping

The Revenue
Department ERP

Fuel import

Summary flow meter
data feed to ERP

Flow meter value

Achievement

PTT

- Air absorb tank (PLC programming).
- Tank farm MOV operation control room (Citect SCADA).
- Lubricant blending operating system (Wonderware).
- Sea berth Paraxylene loading system (Citect SCADA).
- Sea berth firefighting system (Citect SCADA).
- Terminal Automation System (Delphi).

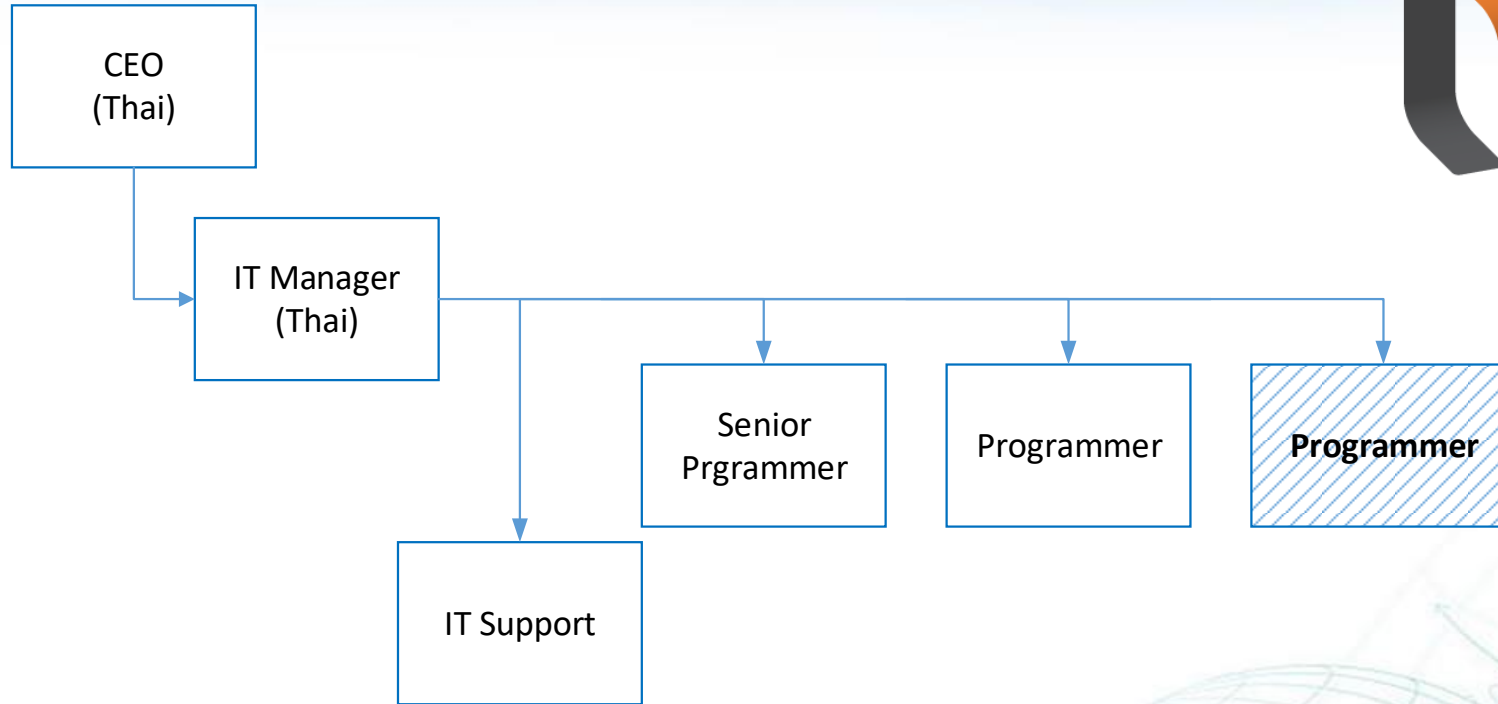

The Revenue Department of Lao People's Democratic Republic

- Real-time fuel transfer monitoring at customs office.
- Fuel metering summary data feed to The Revenue Department ERP.-

Programmer [May 2013 – Apr 2015]

Job Organization

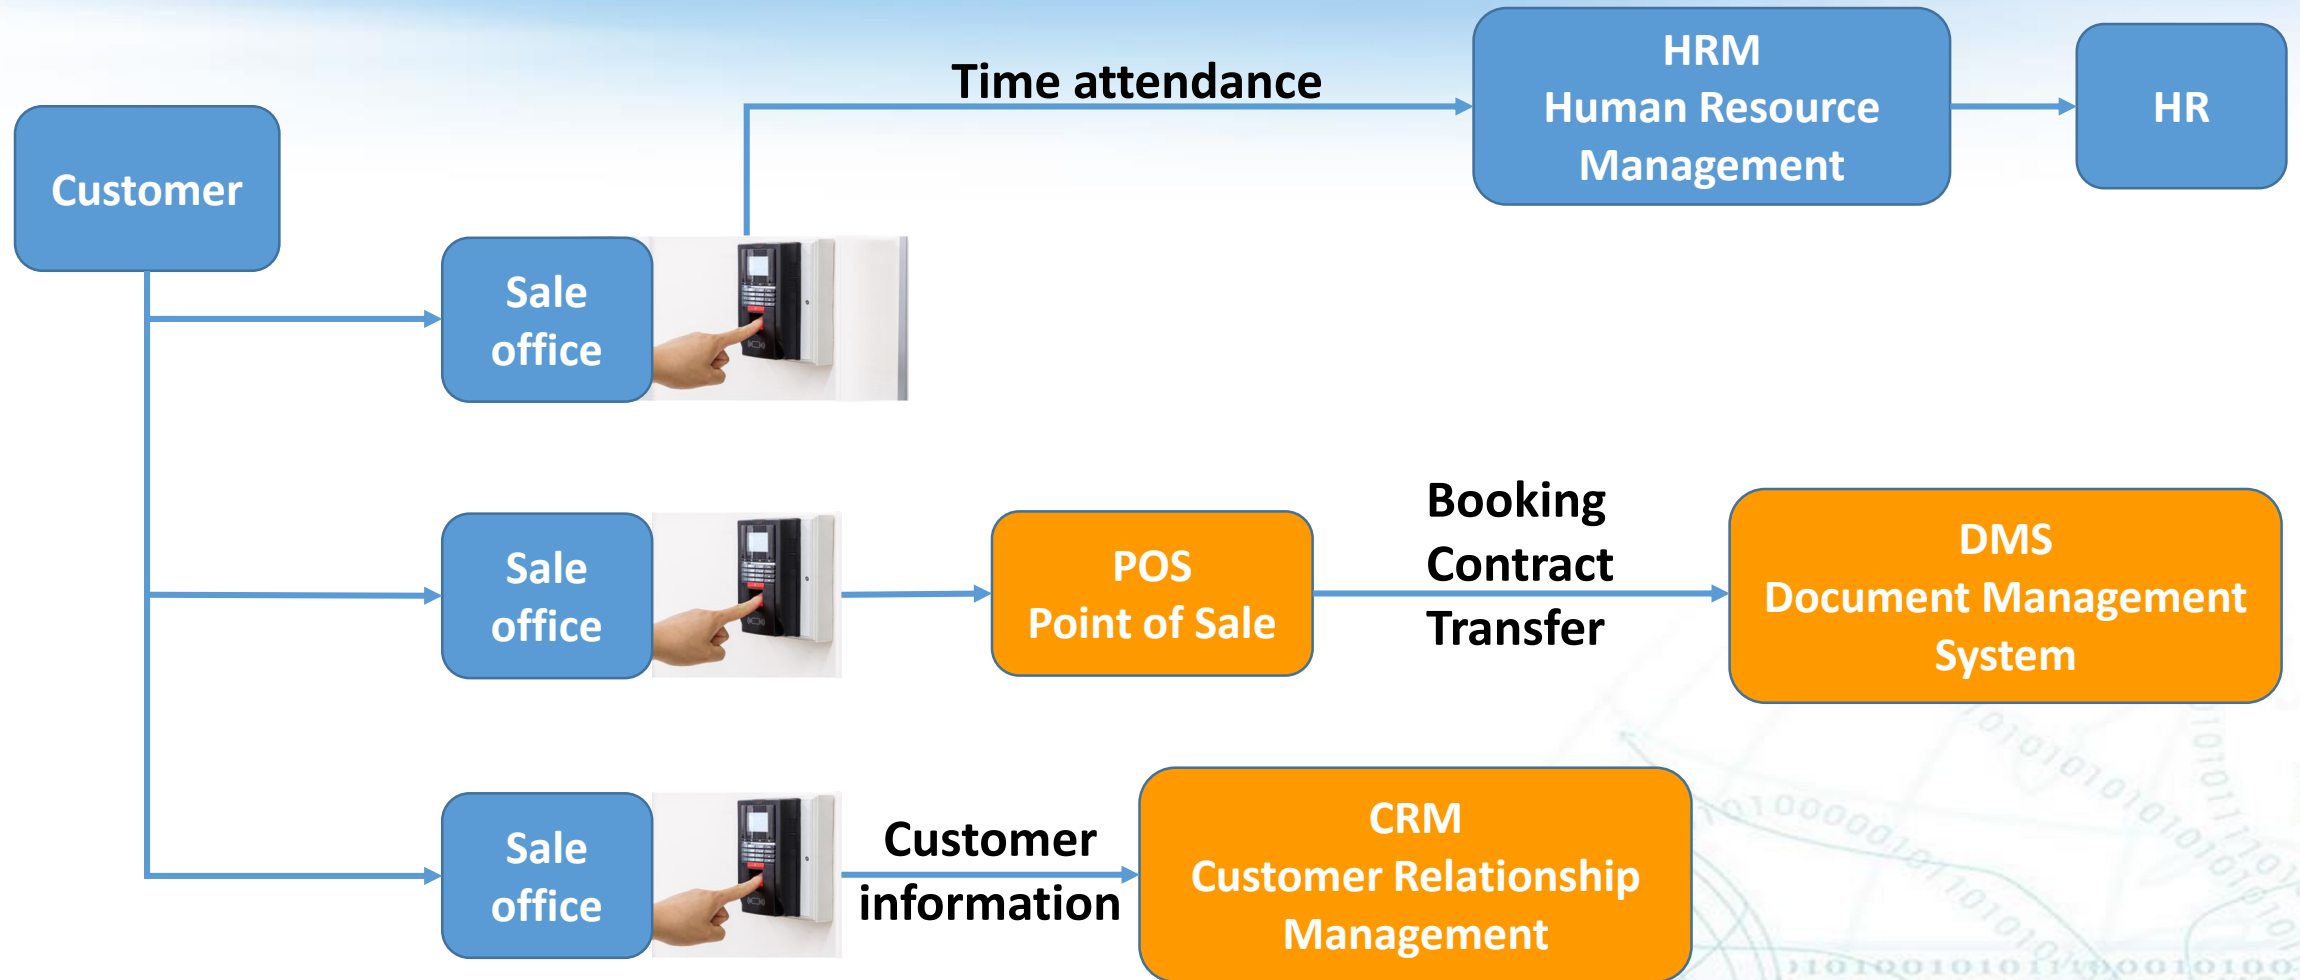

MS SQL

Responsibility Area

Network

Job Overview

 **My Responsibility**

Achievement

POS (Point of Sale)

- System for sale officers to monitoring room, booking and contract.

CRM (Customer Relationship Management)

- Collect customer information and reporting.

DMS (Document Management System)

- Document generate and control (Booking, Contract, Transfer).

HRM (Human Resource Management)

- Collect time attendance of employees for every sale offices and send to HRM.
